PRODUCT DATA SHEET

PUDLO Rawpaste

DESCRIPTION

PUDLO Rawpaste is a sodium bentonite mastic which contains additional polymerised liquid is applied around service penetrations and **PUDLO Rawmat** membrane. **PUDLO Rawpaste** is made of the same composition as **PUDLO Rawmat P**.

USES

PUDLO Rawpaste is applied in voids to even out compacted surfaces prior to application of membrane.

BENEFITS

- Quick and easy to install
- Re-workable when comes in to contact With moisture
- Non-toxic
- Can be applied as an injectable mastic or grease gun

INSTALLATION

Prior to installation all projects must be assessed on a project by project basis as the installation can vary between projects. Please contact PUDLO for typical details and installation instructions.

PUDLO Rawpaste is applied to the base of service pipe penetration by trowel or hand. Once the membrane has been installed and cur around the penetration / pile head a good fillet of material needs to be placed.

PUDLO Rawpaste can be applied between membrane overlaps but it is not a mandatory requirement.

ANCILLARY PRODUCTS

- **PUDLO Rawmat P**
- **Surestop BWB / Surestop SWB (sealing construction joints)**

PACKAGING

PUDLO Rawpaste comes in x1 20kg sealable bucket to retain moisture within the product. Once the bucket has been opened it must be stored under cover and protected from the elements to prevent rain damage.

RESTRICTIONS

PUDLO Rawpaste is soft which will never set or harden. If the material is let left exposed it will dry slightly.
