

MPS CONCRETE SOLUTIONS

Providing quality concrete repair, leak sealing and
jointing solutions for the construction industry

WHY MPS CONCRETE SOLUTIONS?

MPS Concrete Solutions has provided industry leading concrete repair, leak sealing, and jointing to the construction industry since 2013.

From Wimbledon Centre Court to the regeneration of King's Cross, our nationwide team bring world-class concrete and waterproofing expertise to the industry's most prestigious projects.

We are continually investing in our processes and our people. By working with MPS, you're getting the right skills to get the job done, with our team qualified to the highest standards and accredited to ISO 9001 and 14001 quality management standards.

Building relationships with our customers is very important to us and this has resulted in long-term repeat business and countless word of mouth recommendations. We focus on providing hassle-free solutions ensuring we meet the exact requirements of our customers.

1000's

We've worked on 1000's of projects including, large prestigious buildings as well as smaller sites

ISO 9001 & 14001

Accredited to ISO 9001 and 14001 quality

HOW CAN MPS HELP YOU?

MPS Concrete Solutions have decades of combined experience in the world's most enduring industry, which lets us add value from the very first stages of a project.

Working with MPS, your design and construction team access unique insight into materials and techniques to ensure the best result the first time.

MPS Concrete Solutions work collaboratively with the whole team to provide the most robust solution for your project.

OUR SERVICES INCLUDE;

- Concrete Repair
- Injection hose installation
- Penetration Sealing
- Resin Injection
- Piling Injection
- Basement waterproofing
- Deck waterproofing

DON'T JUST TAKE OUR WORD FOR IT...

Our experience spans several sectors and industries, ensuring we have the required experience and accreditations to complete the job. We operate in all market sectors including New Build Buildings Refurbishment, Water, Marine, Rail, Highways and car parks.

We have used MPS on several projects and have found they give the same rapid response and high level of commitment to each job, whether it be a small waterproof render application or a full basement cavity drain installation.
